

ABSTRACT

A movable bathroom-fixture system, comprising bathroom fixtures modified to allow adjustment of their position in a bathroom; and the means to mount said fixtures on bathroom walls so that the fixture placement is adjustable. The modifiable fixtures include a moveable sink
5 fixture, a moveable shower fixture, a moveable wet wall, a height adjustable toilet seat, and drainage tiles. Depending on the size of the bathroom the modifiable fixtures can be slideably and/or removably attached to moveable wall panel units, moveable walls, moveable panels, or fixture interface units.
